

Progettiamo la qualità.

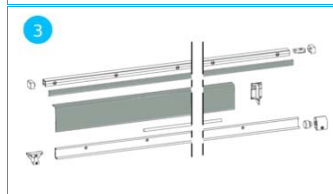

**Discover SP160:**  
**Magic sliding for large windows.**  
**Tilt & Slide - maximum load 160 Kg**

An opening width of **117 mm** allows an easy use of **SP160** with deep and highly insulated profile systems. The inlet and outlet of the sash can be optimally regulated by adjustable reinforcement parts.

A wide range of combinations between rollers, rail set, caps and reinforcement parts, allows sash up to **160 kg** to load.

The super slim covers and color matching cover caps fit harmoniously into the overall picture of modern aluminium design.
