

Press Release

15.12.2020

Master Italy introduces TOPFLEX, the accessories system for folding systems with thermal break.

Master Italy enriches its range of accessories for folding systems with **TOPFLEX**, a complete line specifically designed for folding systems made from oversized aluminium profiles, which boasts high thermal performance.

The company has already been active in the market for several years with **LIGHTFLEX**, the complete system that can be installed on cold profiles.

In 2021, Master completes its **Folding Line** with **TOPFLEX**, the range developed to bear the weight of the system and to ensure the sealing performance of **thermal break** profiles. The rollers and hinges of the **TOPFLEX** system are suitable for creating hardware for doors and windows with loads up to **120 kg per leaf/sash**, with dimensions that can reach up to **3.50 m high** and configurations **up to 8 leaves/sashes, 1.20 m wide**.

Like the **LIGHTFLEX** accessories, the **TOPFLEX** range of accessories is highly versatile, making it possible to create the system with **standard, recessed or low threshold**.

TOPFLEX and **LIGHTFLEX** make up the complete Master system that covers any requirements relating to use, including cold and light solutions, both foldable and sliding, with glass or strips, in the **LIGHTFLEX** version, and solutions for oversized thermal break profiles boasting utmost comfort and performance, in the **TOPFLEX** version.

Master Group has been designing and manufacturing accessories and parts for aluminium door and window frames since 1986. The core processes of the company consist of research, investment, study of the aluminium culture, with great focus on the quality of materials and cutting edge technologies for manufacturing high-performance products, as well as on identifying new market requirements and ensuring customer satisfaction and constant customer care.

The safety features of the system have been carefully considered, given that both LIGHTFLEX and TOPFLEX are suitable for installing locking systems **with lock on each leaf/sash.**

All accessories are available in oxidized or painted finishes.
