

Smart solutions for global window systems.

MASTER GROUP

Since 1986 the **Master Group** has **designed** and **manufactured high-tech accessories and components** for aluminum enclosures, managing **95% of production in-house**.

The Master brand represents excellence in the sector, aimed at the development of new international markets, with an **export turnover** that represents approximately **52%** of the total and a number of finished products in the catalog of more than 25,000 references.

The Group's constant expansion is sup-

ported by several key factors, among which is the **continuous innovation** of processes and the adoption of **advanced technologies**.

Investments in **Research & Development**, carried out by the **MasterLAB** research center, play a crucial role.

The company has built an organizational culture that adheres to the key principles of **Lean Manufacturing** to achieve optimal service levels guaranteeing, today, **95% on-time delivery**. The identification of new market needs and the continuous commitment to **customer care** and **satisfaction** are at the center of the company's philosophy.

THE NEW ESSENTIAL

NIX the new line of **concealed handles** for all **types of opening**.

NIX is a **new concept** that takes **minimalism** to the extreme up to the idea of **"nothing"** as the maximum form of **elegance**. NIX handle merges and **integrates completely into the window profile**.

THE NEW ESSENTIAL

Minimal design thanks to the internal side mounting which makes the handle completely hidden.

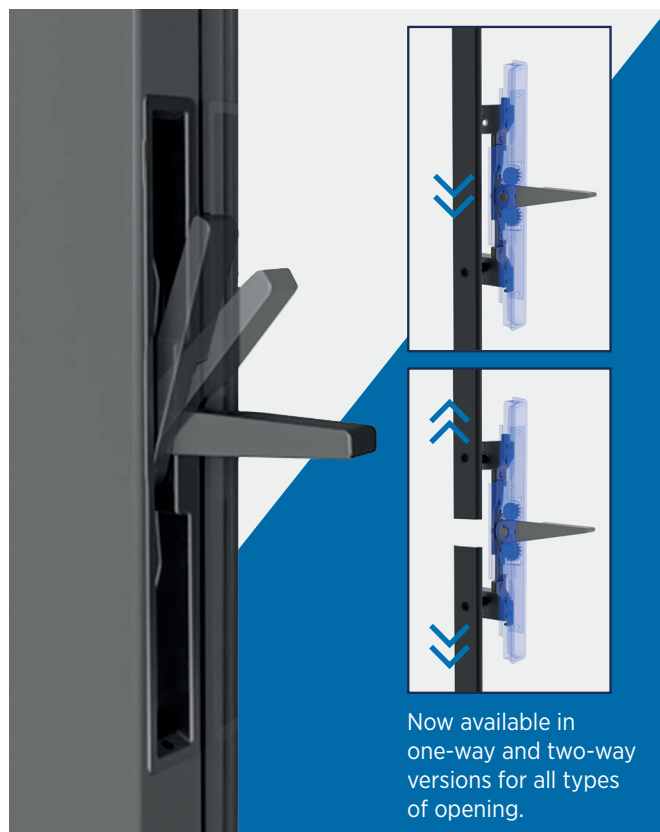

Universal application and maximum compatibility with the most used profiles thanks to the versatile rod attachment system.

Comfortable during casement and tilt opening phases thanks to the wide grip of the recessed handle.

Maximum versatility with different installation modes based on the type of opening.

THE INTELLIGENT SYSTEM FOR THE WINDOWS OF THE FUTURE

APRO is designed above all to respond to the need to make the **openings** of modern residential, commercial and industrial buildings **automatic and intelligent**, enhancing the design of these new architectures thanks to a range of accessories capable of transforming any window or door into an integrated home automation element.

The range consists of **overlaid** or **built-in actuators** of extremely small size that combine movement efficiency and design, complemented by locking systems and control devices via gateways interfaced with a **dedicated app**.

THE INVISIBLE SOLUTION FOR ALL TYPES OF OPENING

The new **WEEN HIDE 180** is Master Italy's solution for **tilt & turn, casement and bottom hung** systems that meets all requirements in terms of load-bearing capacity, design, functionality and durability.

WEEN HIDE 180 is the most advanced and high-performance version of the WEEN PROGRAM, with a **minimalist design** featuring concealed hinges with 180° opening that can be used for all types of opening systems.

KARMA®

THE NEW COMPLETE LINE OF DESIGN CREMONE, HANDLES, OFFSET HANDLES, DOOR HANDLES, PULL HANDLES

KARMA is the new complete line of design **cremone bolts, handles, offset handles, twin handles, and grab bars** specifically created to satisfy all requirements of the continuously evolving market of door and window hardware.

The true strength of KARMA lies in the fact that it offers a **comprehensive range of technical solutions** that beautifully integrate the original design features.

EASY
TO INSTALL

CILINDRIKA

THE HINGE FOR SLIM DOORS, QUICK TO INSTALL AND EASY TO ADJUST

The **single stainless-steel pin** with an internal adjustment system is one of the most important features of **CILINDRIKA**, along with its **speed and ease of installation**. Thanks to its **quick-coupling plates**, the hinge can be fixed to the profiles without any additional machining.

Once installed the unique adjustment system on the door side, integrated into the insert-type fixing plate, allows for **three independent adjustments**: horizontal (alignment): ± 1.5 mm, vertical (height): $0/+4$ mm, pressure (compression): $0/+1$ mm.
